

John Uzoka

EDUCATION

University of Lethbridge
Lethbridge, AB — *Bachelor of Science, Computer Science*
SEPTEMBER 2022 - DECEMBER 2026

- Cooperative Education Program Student
- Minor in New Media
- Completed coursework in Data Structures and Algorithms
Computer Architecture, Digital Systems, Networking,, 3D,
Software/Game Development

EXPERIENCE

Video Game Programmer
Toronto, ON — *Billy's Cookies*
March 2025 - APRIL 2025

- Built a modular, persistent real-time state system for Vampire Farming Game using Godot engine
- Collaborated on source control with strong detail oriented problem-solving and attention to detail using agile development processes
- Optimized and debugged complex game logic; integrated visual art elements and documented system for future use
- Consistently met deadlines and exceeded expectations

Unreal Developer
Quebec, QC — *Alvia Systems*
MARCH 2024 - AUGUST 2024

- Leveraged Unreal Engine and C++ skills to develop an efficient forest fire estimation and mapping system, using point cloud 3D scan data.
- Collaborated closely with team members to keep projects on track and meet anticipated deadlines.
- Documented technical specifications and project testing methods for future reference.

Computer Technician
Calgary, AB — *Novena Systems and Technologies*
JUNE 2017 - AUGUST 2022

- Performed comprehensive testing and troubleshooting on a wide range of devices including phones, laptops, desktop systems, monitors and other peripherals
- Repaired and refurbished a variety of devices including phones, laptops, desktop computers, tablets, and other electronics.

PROJECTS

Unreal Engine 5 C++ Development
Leveraged Unreal Engine 5 with Visual Studio to develop and prototype five 3D single-player games, integrating C++ components and blueprint scripting. Designed functional levels and applied object-oriented design, class inheritance, and composition. Prioritized efficient memory usage for optimal performance.

C++ Text-Based Adventure Game
Collaborated on a C++ text-based adventure game using Git for version control. GitLab Pipelines, and Github Actions for CI/DI.
Applied SOLID principles, object-oriented design, and quality control practices to deliver scalable, maintainable software.

Cloud Server Project
Built and maintained a Linux-based cloud server, evaluating hardware and securely hosting it on a web domain.

SKILLS

- Computer Science Expertise:** Well-versed in computer science theory, as well as OOAD software design principles, enabling seamless adaptation in various software environments.
- Object Oriented Programming:** Strong knowledge of programming and testing in C++, I also have knowledge of Python/C# basics..
- 3D Modeling and animation skills:** proficient in 3D modeling, rigging and animation in blender.
- Game Development:** Designed and built multiple Mobile and PC games in Unreal Engine using blueprints and C++. I also have experience with metahuman assets.
- Communication and Teamwork:** Applied strong communication skills in a team environment at OSL, contributing to a seamless working atmosphere, working using agile development processes in a team using GitHub at The University of Lethbridge.
- Web development Competence:** Exhibited expertise in crafting captivating web applications using CSS and HTML at the University of Lethbridge. I have also had basic experience with Javascript.
- General Microsoft Office applications:** Skilled in Microsoft Office 365 applications (Word, Excel, Access, PowerPoint, Outlook).
- Basic Server Experience:** Established and utilized Linux for basic server operations.
- Docker:** Basic proficiency in managing and creating Linux-based application containers with Docker.
- Hardware Assembly & Troubleshooting:** Proficient in PC assembly and repair , along with Knowledge of software installation and troubleshooting in a Windows environment mostly in windows 10 and 11. I also have experience installing and configuring computer hardware, software, systems, networks, printers, and scanners
- Windows & Linux OS Proficiency with CLI Skills:** I have understanding of the Windows 10 operating systems including: file systems, permissions, services and registry structures. Proficient in Linux distributions such as Ubuntu and Mint. Skilled in utilizing command-line interfaces for both Windows and Linux environments.
- HOBBIES & INTERESTS**
- Computer hardware assembly and modding:** Passion for meticulously crafting and optimizing computer hardware systems, with a proven track record of skillfully assembling and modding computers to achieve optimal performance and functionality.
- Video Game Development:** Cultivated a keen interest in Unreal Engine since high school, with recent endeavors focused on integrating C++ skills into game development. A proactive learner committed to translating creativity into interactive and immersive gaming experiences.
- 3D modeling/animation:** Experienced in utilizing Blender to craft 3D renders and models. Proficient in the creation of custom visual assets, showcasing a dedication to precision and creativity within the realm of 3D design.
